

Cruise Car All American Series

Cruise Car, Inc. is the first global company of its kind whose entire mission is to provide high quality, sustainable and affordable alternative transportation products to individuals, corporations and government entities. These American made Neighborhood Electric Vehicles (NEV) and Low Speed Vehicles (LSV) are easy to drive, easy to maintain and operate without the need of gasoline.

Cruise Car Inc. leads the world with the largest selection of 2-14 passenger vehicles and light utility trucks - all available with solar and street-legal package upgrades. **

- Built in the USA using superior components
-  Contains parts manufactured from recycled content, all covered by a new vehicle warranty.
- Vehicles can travel 5-10 miles a day "off-grid" when equipped with solar
- 40+ mile standard range; available with 80+ mile range option
- Can be equipped with optional exclusive ETA E-Meter for measuring grid energy savings and carbon foot print.
- Solar power can keep battery charge topped off - extending battery life by 30% or more.
- Built for industrial applications...strong and durable construction; easy to maintain
- Federal Cash Grants are now available to offset the solar premium (USA sales only for the 2011 tax year)
- Silent transportation – no sound disturbances
- All aluminum chassis and aluminum fabrication = no rust issues
- 35+ years of specialty low speed vehicle manufacturing experience

Cruise Car offers property maintenance vehicles, executive runabouts and extended range shuttles. Currently in use at hundreds of military bases, resorts, universities, municipalities, multi-national corporations, national parks, security applications etc.
